Care for the Planet Chessboards

School fundraising opportunity: Participate in “The Pink Turtle Chessboard Challenge” and raise funds for your school and more...

Roger Carthew, mastermind behind the revolutionary Pink Turtle Enviro Mat Chessboards, makes it possible for your students to come up with their own chessboard; learning, being creative, and having fun - at the same time designing an ideal school memento. It could be printed in school colours, have students names, faces or even class pictures printed on them, if you so wish. The possibilities are as endless as your students' imaginations!

All your students need do, is get designing! Run a competition within your school to come up with the best and most striking design and then order. Pink Turtle does the rest. From all the designs sent, PT will select the best for the “Chessboard Challenge Gallery”.

Good luck - designers are winners!

To get you playing, learning and competing, Pink Turtle has some great offers.

- ▶ **Buy one & get \$8 back.** For every chessboard sold through this offer, Pink Turtle guarantees to donate back to the school, 20% of the proceeds, to further encourage creativity and environmental awareness in students.
- ▶ **Buy 30 & get \$360 back plus a \$300 coaching package.** It's simple, buy 30 board/piece packages and you're on your way, playing and learning.
- ▶ **Buy 40 & get \$480 back plus a \$300 coaching package AND \$520 towards Interschool Chess entry.** Choose this and you're ready to play, be professionally coached, and provided competition entry; perhaps setting the scene for discovering the next Grand Master.
- ▶ **Extra Bonus: Get a gift valued at \$190.** Every student design you order is automatically entered into our “Challenge Gallery” Competition.
Be in it to win it!

Act now, as this offer is introductory and lasts only until sold out. Call, email, or fax today, to reserve your package offer whilst you go designing.

Thank you, enjoy and play with PT,

Gympie the Pink Turtle
for and on behalf of Roger Carthew

P.S. The value for you here is so great, the next step would be to give you PT itself and we can't do this just for now. Enjoy!

What's an Enviro- Mat Chessboard

The enviro mat chessboards are made out of recycled and environmentally friendly materials including reprocessed car tyres, PET drink bottles and have been printed with the aid of solar powered printers. The drink coaster sample enclosed is made of just these materials, beautifully printed with one of our designs. At full size, these boards measure 50cm X 50cm, are brilliantly printed, are easy to use and make great travel boards.
